UNIT I INTRODUCTION TO OPERATIONS RESEARCH

Preface These lecture notes were written during the Fall/Spring 2013/14 semesters to accompany lectures of the course IEOR 4004: Introduction to Operations Research - Deterministic Models.

Introduction to Operations Research

Operations Research (Management Science) is a scientific approach to decision making that seeks to best design and operate a system, usually under conditions requiring the allocation of scarce resources. A system is an organization of interdependent components that work together to accomplish the goal of the system.

unified into what is considered the standard toolkit for an operations research analyst and successfully applied to problems of industrial significance. The following section describes the approach taken by operations research in order to solve problems and explores how all of these methodologies fit into the O.R. framework.

Principles and Applications of Operations Research

or they can be made of different materials, such as a plastic model of the solar system. On the other end of the model spectrum are abstract mathematical models (Figure 1). OR professionals often use mathematical models to make simplified representations of complex systems. Regardless of the type of model used, modeling includes the following steps: 1.

Operations Research: An Introduction to Models and

Most operations research studies involve the construction of a mathematical model. The model is a collection of logical and mathematical relationships that represents aspects of the situation under study.

Operations Research (OR) is the study of mathematical models for complex organizational systems. Optimization is a branch of OR which uses mathematical techniques such as linear and nonlinear programming to derive values for system variables that will optimize performance. When operations research is used to solve an organization's problem, the following seven-step model-building procedure should be followed: Step 1: Formulate the Problem The operations researcher first defines the organization's

An Introduction to Model Building - UFRGS

Operation Research model is an idealised representation of the real life situation and represents one or more aspects of reality. Examples of operation research models are: a map, activity charts balance sheets, PERT network, break-even equation, economic ordering quantity equation etc. Objective of the model is to provide a means for ...
