The relationship between biology and sexual orientation is a subject of research. While scientists do not know the exact cause of sexual orientation, they theorize that a combination of genetic, hormonal, and social factors determine it. Hypotheses for the impact of the post-natal social environment on sexual orientation, however, are weak, especially for males.

Sexual orientation change efforts (SOCE) are methods used in attempts to change the sexual orientation of homosexual and bisexual people to heterosexuality. They may include behavioral techniques, cognitive behavioral techniques, psychoanalytic techniques, medical approaches, religious and spiritual approaches, and, in some parts of the world, acts of sexual violence ("corrective rape").
