Ecology and Evolutionary Biology (EEB) is a peer-reviewed, open access journal that publishes original research articles as well as review articles in all areas of ecology and evolutionary biology. The aim of the journal is to integrate perspectives across molecular and microbial evolution, behavior, genetics, ecology, life histories, development, paleontology, systematics and morphology.

Ecology and Evolutionary Biology :: Science Publishing Group

Biology is the natural science that studies life and living organisms, including their physical structure, chemical processes, molecular interactions, physiological mechanisms, development and evolution. Despite the complexity of the science, there are certain unifying concepts that consolidate it into a single, coherent field. Biology recognizes the cell as the basic unit of life, genes as ...

Biology - Wikipedia

Perspectives. The main processes involved in the embryonic development of animals are: regional specification, morphogenesis, cell differentiation, growth, and the overall control of timing explored in evolutionary developmental biology: . Regional specification refers to the processes that create spatial pattern in a ball or sheet of initially similar cells.

Developmental biology - Wikipedia

As the highest-ranked open access journal in its field, Genome Biology publishes outstanding research that advances the fields of biology and biomedicine from a genomic and post-genomic perspective. Our responsive international editors provide excellent service and communication to authors throughout the entire publishing experience.
