Motor imagery is a mental process by which an individual rehearses or simulates a given action. It is widely used in sport training as mental practice of action, neurological rehabilitation, and has also been employed as a research paradigm in cognitive neuroscience and cognitive psychology to investigate the content and the structure of covert processes (i.e., unconscious) that precede the ...

In social science and politics, power is the capacity of an individual to influence the conduct (behaviour) of others. The term "authority" is often used for power that is perceived as legitimate by the social structure. Power can be seen as evil or unjust, this sort of primitive exercise of power is historically endemic to humans, however as social beings the same concept is seen as good and ...
