A pattern and a path to discovering what you are meant to do in your life based on the identity of your Gift. Each of us are created with a unique Divine Attribute and each day we are given opportunities to apply it in our life. In so doing we come to realize our purpose and that purpose leads to our call.

### **Your True DNA â€” Your True DNA**

6. During the late 1940s, English scientists discovered that DNA (like sugar) can crystalize when water is removed. This fact suggested that the atoms in DNA must be arranged in a very orderly way, perhaps with many repetitions of a fairly simple pattern. Protein, by contrast, doesnâ€™t crystalize. Clues Set 2 7.

### **Discovering the Structure of DNA - Henry County School**

The structure of DNA, as represented in Watson and Crick's model, is a double-stranded, antiparallel, right-handed helix. The sugar-phosphate backbones of the DNA strands make up the outside of the helix, while the nitrogenous bases are found on the inside and form hydrogen-bonded pairs that hold the DNA strands together.

Abstract All living things have DNA inside their cells. How do scientists extract the DNA from cells in order to study it? In this science experiment you can make your own DNA extraction kit from household chemicals and use it to extract DNA from strawberries.

### **Do-It-Yourself DNA | Science Project**

DNA is a long polymer made from repeating units called nucleotides. The structure of DNA is dynamic along its length, being capable of coiling into tight loops and other shapes. In all species it is composed of two helical chains, bound to each other by hydrogen bonds. Both chains are coiled around the same axis, and have the same pitch of 34 Ångströms (3.4 nanometres).
